

The graph shows the relationship between flow rate and pressure for a 1000 cc pump. The y-axis represents pressure in BAR, ranging from 0 to 5.2. The x-axis represents flow rate in liters per minute (lt/min), ranging from 0 to 8.4. The curve indicates that the pressure remains relatively low (below 1.6 BAR) for flow rates up to about 4.8 lt/min, after which it rises sharply, reaching 5.2 BAR at approximately 4.8 lt/min.
