

The graph displays the relationship between flow rate and back pressure. The x-axis represents flow rate in liters per minute (l/min), ranging from 0 to 7.2. The y-axis represents back pressure in BAR, ranging from 0 to 5.2. The curve shows a sharp increase in pressure starting around 4.8 l/min, reaching a peak of approximately 5.0 BAR at 4.9 l/min, followed by a rapid drop to about 2.5 BAR at 5.2 l/min, and then a gradual decrease to 0.5 BAR at 6.0 l/min.
