

A line graph showing the relationship between flow rate and bar pressure. The x-axis is labeled 'Flow rate It/min' and ranges from 0 to 37 with major ticks every 2 units. The y-axis is labeled 'BAR pressure' and ranges from 0 to 5.2 with major ticks every 0.4 units. A single blue curve starts at approximately (8, 0.6) and rises steeply, passing through points like (15, 1.6), (20, 2.8), and ending near (26, 5.0). The curve shows some minor fluctuations at higher pressures.
