

The graph displays the relationship between flow rate and pressure for a 1000 cc/min flow rate. The x-axis represents flow rate in lt/min, ranging from 0 to 8.4. The y-axis represents pressure in BAR, ranging from 0 to 5.2. The curve shows a sharp increase in pressure as flow rate increases, starting around 0.4 BAR at 2.4 lt/min and reaching approximately 4.8 BAR at 4.8 lt/min.
